About Us

At Aylar Tente, we take immense pride in offering aesthetically pleasing solutions that meet the demands of all of our customers. Since our inception in 1984, we have been operating under the name AYLAR TENTE Ind. Trade Co. Ltd. with passion and dedication. Since then, we have accomplished numerous milestones in our industry, while also expanding and growing. Now, our service covers a total area of 2200m², with 1500Am² of that being enclosed. It is staffed by a team of highly knowledgeable professionals, who all share the same core values. Our commitment to excellence, diligent work, and dedication to our customers has enabled us to reach the level of success we currently enjoy.

With nearly 40 years of experience in the awning industry, we have fine-tuned our manufacturing process to ensure that our customers get exactly what they need. We understand that our products need to create aesthetically pleasing and comfortable living spaces that can withstand any weather. As a result, we are committed to providing quality, safe, and economical services from the foundation all the way up to the roof of a building. Our modern and chic awning and construction systems are designed to fit all tastes and budgets, and we strive to always exceed our customers' expectations. We are constantly innovating and exploring new ways to provide even better services. We are always excited to see how our customers use our products to make their dream living spaces come true.

ROOLING ROOF PERGOLA

STANDART BLOCKOUT PERGOLA

BIOCLIMATIC PERGOLA

BIOCLIMATIC PERGOLA

The aluminum profiles used in the system are 6063-T6 F25 (7580 Brinell Hardness). All profiles are electrostatically oven-painted and packaged (Powder Coating).

All accessories are packaged with galvanized and electrostatic oven paint (Powder Coating) for added protection. The movable roof cover is made of aluminum metal.

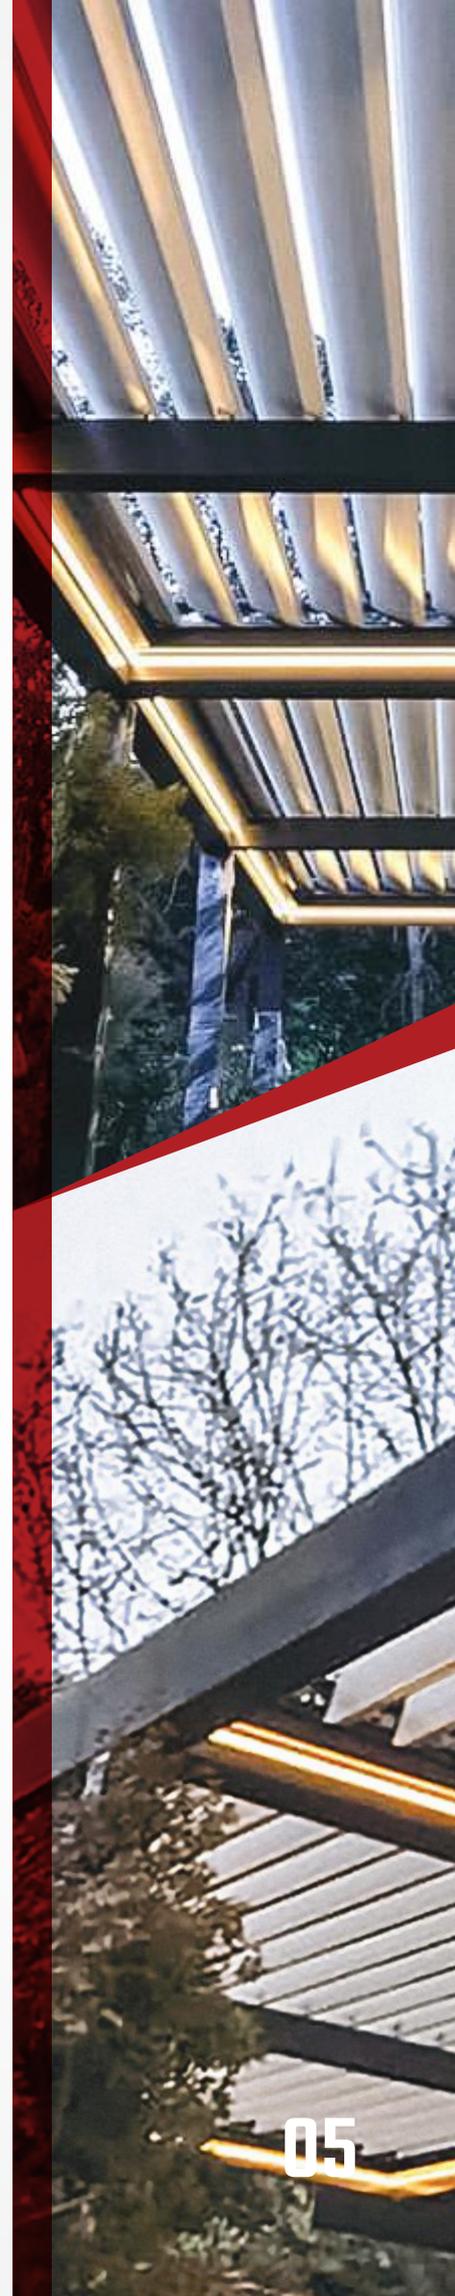

For more information:

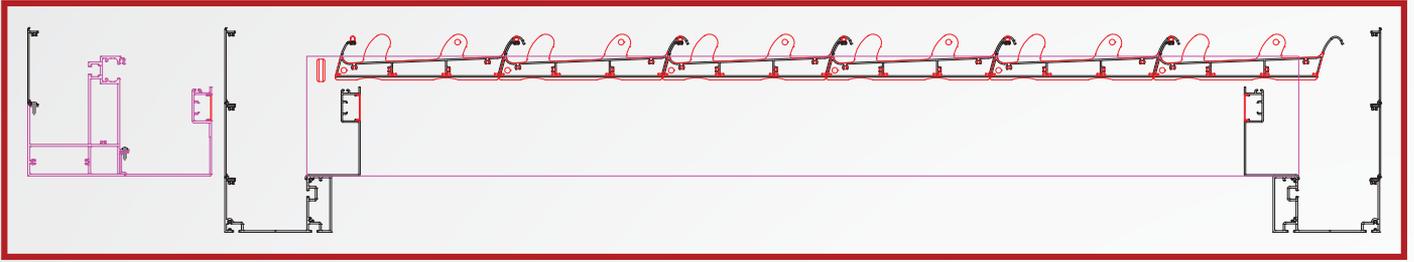

FEATURES

- The aluminum profiles used in the system are 6063-T6 F25 (7580 Brinell Hardness).
- All profiles are electrostatically oven-painted (Powder Coating) and packaged.
- All accessories are packaged with galvanized and electrostatic oven paint (Powder Coating) for added protection.
- The movable roof cover is made of aluminum metal. The panels operate axially and can be retracted when desired. This is a key feature for providing both ventilation and shading.
- The panels can open at a minimum angle of 105 degrees axially, which is important for blocking the sun from the facade.
- The groove detail is aluminum and does not carry water out; the water is discharged from the carrier legs.
- The opening and closing movement of the ceiling cover is provided by remote control.
- The system is designed and produced to withstand all seasonal conditions. A timing belt provides power transmission between the engine and the moving mechanism and is adjustable.
- Vertical carrier aluminum profiles are fixed to the floor by the steel screwing method.

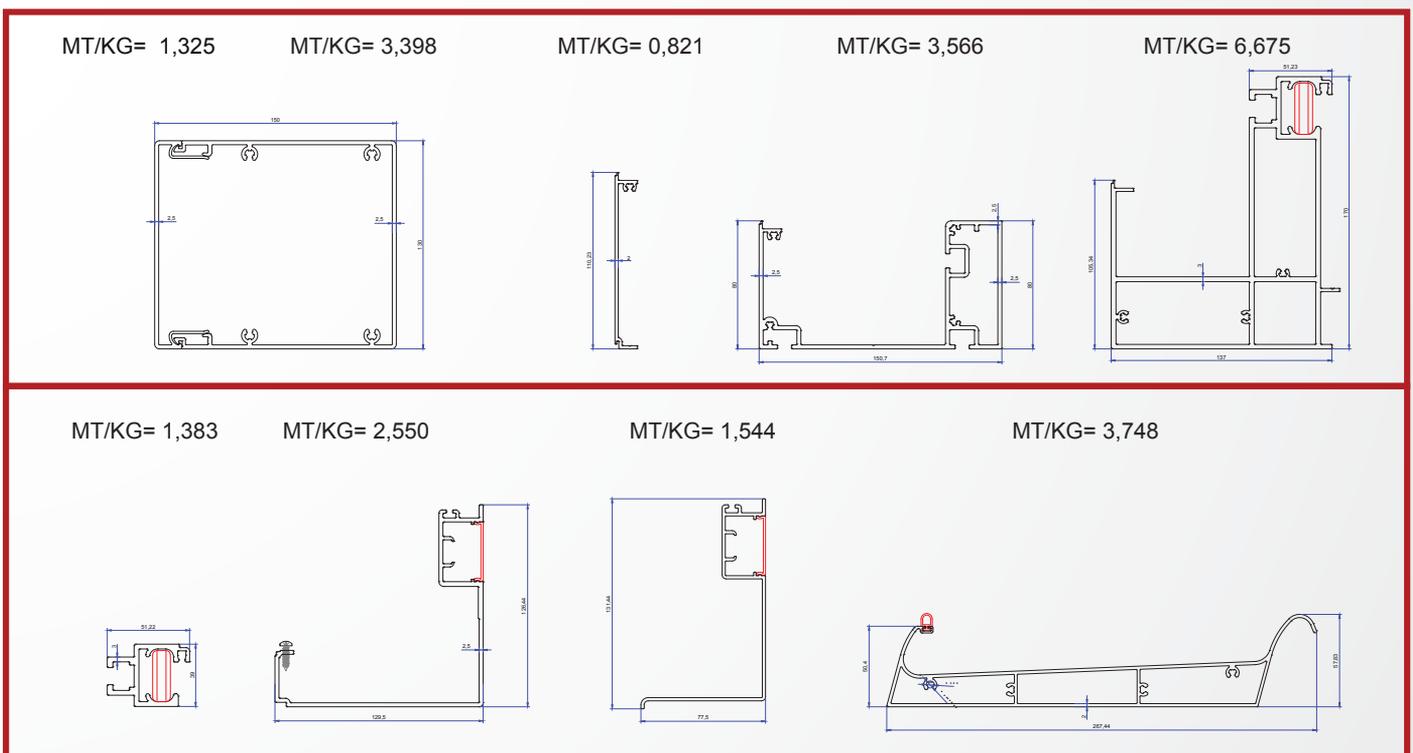

- Flange application screws are M12 *100 Rod or M12 *80 Covered Steel dowel, both of which are galvanized to prevent damage to the floor insulation.
- The wicks used in the system are EPDM wicks.
- Silicones to be used are NPI Brand Belgium imported polyurethane mastic silicone.
- The system has 5 years of motor and 2 years of mechanical warranty.
- System modules have static features to meet 50kg+25kg/m² distributed load and 50kg/m² wind load.
- The system modules are equipped with special panels that enable ventilation even in rainy weather.
- The axial and rebound movements of the aluminum panels are driven by separate motors.
- The system is designed with special gaskets on the panels, preventing water absorption when closed.
- An extra motor enables backward movement.
- RGB light can be adapted into the system.

- High-strength poles measuring 130 mm x 150 mm x 2.5 mm are designed to withstand heavy loads.
- The special corrugated design of the panels prevents water overflow and collection.
- The system is designed to cover large areas with minimal support poles.
- It can reach maximum dimensions of 7000mm front X 5500mm opening or 4500mm front X 8000mm opening.
- The system is suitable for suspension-type mounting in certain dimensions.
- Insulated steel rope is preferred for sound insulation and corrosion prevention.
- A specially developed timing belt with steel wire support and high tensile strength is used.
- The control panel allows for the piston engine and light to be controlled with a single command.

STANDART BLOCKOUT PERGOLA

The PVC Blockout surface material is waterproof, making it suitable for use in all four seasons. No maintenance is required. Electrostatic Powder Coating offers an unlimited selection of colors.

Production is trouble-free and use is long-lasting when fabric and roving details are specially processed in the High-Frequency bonding machine.

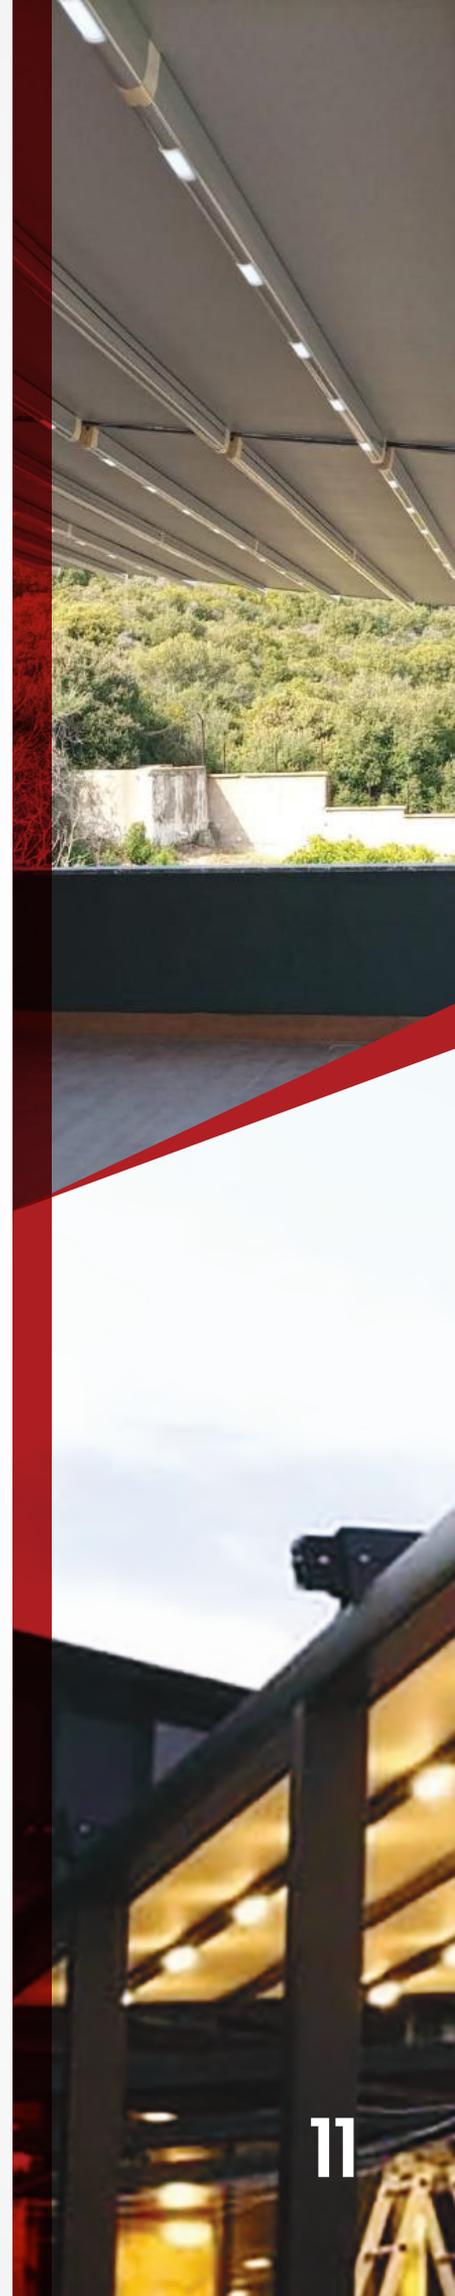

For more information:

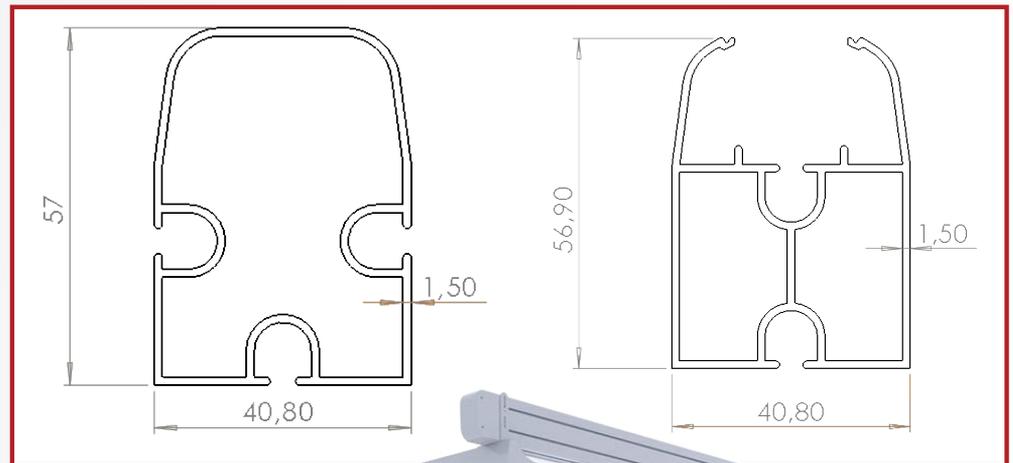

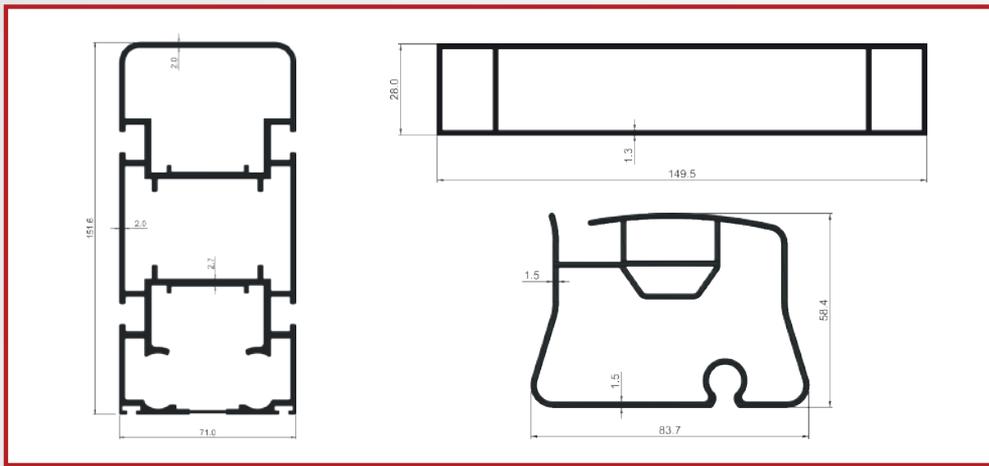

FEATURES

- You can open up to 11 meters with 70x150, 90x150, and 110x150 rails.
- Robust carrier profiles come with two sizes of uprights: 100x100 and 110x145.
- This space offers comfortable designs with LED lighting, remote dimming, raising and closing, and opening functions.
- Production is trouble-free and use is long-lasting when fabric and roving details are specially processed in the High-Frequency bonding machine.
- Our products are certified to both ISO 9001 and CE standards, meeting international requirements.

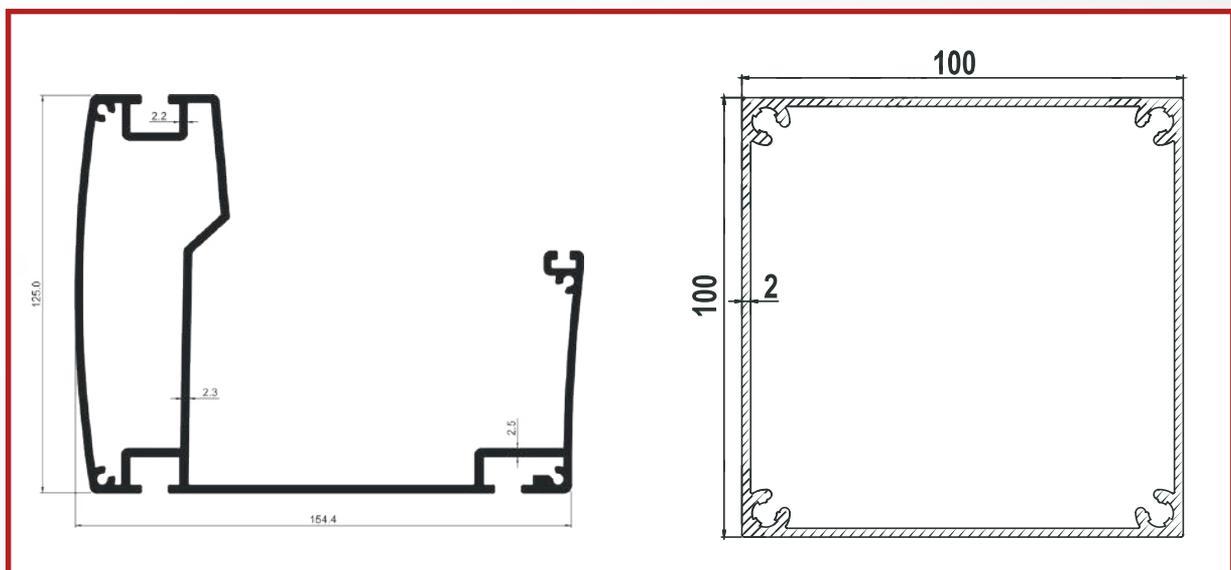

- Our products are painted with electrostatic powder paint made of high-strength aluminum alloy.
- Our blackout fabric systems are 100% lightproof, 3-layer, and non-flammable.
- The layer is covered with anti-flame glaze, the opaque layer is on the back, and the polyester layer is on the front, ensuring both color and pattern are uncompromised.
- This product can open up to 1150 cm, making it one of the highest covering area systems that work in one piece.
- It is designed with thick rails for high durability and strength. It is suitable for wide or narrow spaces and offers unlimited color options with electrostatic powder paint.

- It has a decorative and stylish appearance with its 100x100 or 110x145 mm carrier front pillars and 70x150 - 90x150 or 110x150 mm rails.
- It is equipped with a remote control system, allowing it to be opened and closed with a single button.
- It is made suitable for use in all seasons with its waterproof PVC blackout surface material. The blackout system is processed in the frequency machine for trouble-free production and longer service life.
- It has a special maintenance-free design system, and an optional recessed LED lighting system is also offered. It is designed to be highly resistant to seasonal conditions and has electrostatic powder-painted or zinc-plated connection equipment.
- Our products are ISO 9001 and CE certified and manufactured to international standards.

ROLLING ROOF PERGOLA

The folding roof system, designed to world standards, is the perfect solution for any space and season. Its aluminum structure is designed to provide you with the desired level of shade, ensuring protection from changing weather conditions without the risk of corrosion. With a wide range of colors and designs available, it is sure to add an aesthetic appeal to any space, as well as provide additional protection from dust, sand, and other allergens that may be present in the environment.

What's more, its heavy-duty construction ensures that it can withstand any extreme weather conditions that may arise. All in all, Rolling Roof Pergola is a great choice for any space, offering superior protection and a stylish look.

For more information:

FEATURES

- This product provides shading at the desired rate, with adjustable panels that can be set to any angle.
- It protects hygiene by blocking dust and other particles from entering the surface. No more dust or similar components can pass through.
- This eliminates the need to go to the roof for easy cleaning conditions.
- It complements any environment with its broad range of colors.
- Compared to other sunroof systems, the rolling roof pergola maintains both folding and gathering movements, providing more utility and comfort.
- The movable panels keep the desired sunlight ratio in your space, no matter the angle. It's suitable for all seasons, and ventilation is not affected by rain or snow.
- It's especially helpful in smoke-free areas. Plus, it has a motorized system and is operated with a remote control.
- Made of aluminum, it is long-lasting and rust-resistant. It is colored with electrostatic oven paint, (Powder Coating) offering a wide range of options.
- Suitable for all areas, it increases the aesthetics and beauty of the place, even when closed.
- Its aluminum lamella and duct seal provide water and dirt isolation, while also cleaning the environment from allergens and other contaminants.

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- The same motor powers both the rebound and axial panel motions. It is a single-motor system.
- The roof of the structure is constructed from aluminum, and the wicks are made of EPDM.
- It consists of panels that can open more than 105 degrees axially.
- 6063-T6 F25 Aluminum profiles with 7580 Brinell Hardness are employed in the system.

- Vertical carrier profiles measure 16 cm by 14 cm, while horizontal carrier profiles measure 12 cm by 18 cm.
- The carrier legs are equipped with an aluminum groove detail to ensure water doesn't overflow. It carries the water out efficiently.
- Aluminum lamella and duct gasket provide water and dirt isolation.
- The motorized system is operated via a remote control.
- Integration with the automation system helps prevent usage errors.
- The system works best when the slope is between 5% and 8%.
- This system includes modules with static properties designed to withstand 25 kg/m² distributed load and 50 kg/m² wind load.
- Coloring is achieved using electrostatic oven paint (Powder Coating)

RETRACTABLE GLASS ROOF

The Retractable Glass Roof is an exquisite addition to any space, providing a unique and stylish touch. Enjoy the comfort of being indoors while experiencing the warmth of the sun, or the captivating beauty of the snow and rain, all from the comfort of your own home. These waterproof glasses are perfect for bringing the sky closer to you, making them an ideal choice for gardens, terraces, and other outdoor settings.

With the Retractable Glass Roof, you can experience the beauty of each season in a whole new way and enjoy the feeling of being outdoors, while still in the safety and comfort of your own home.

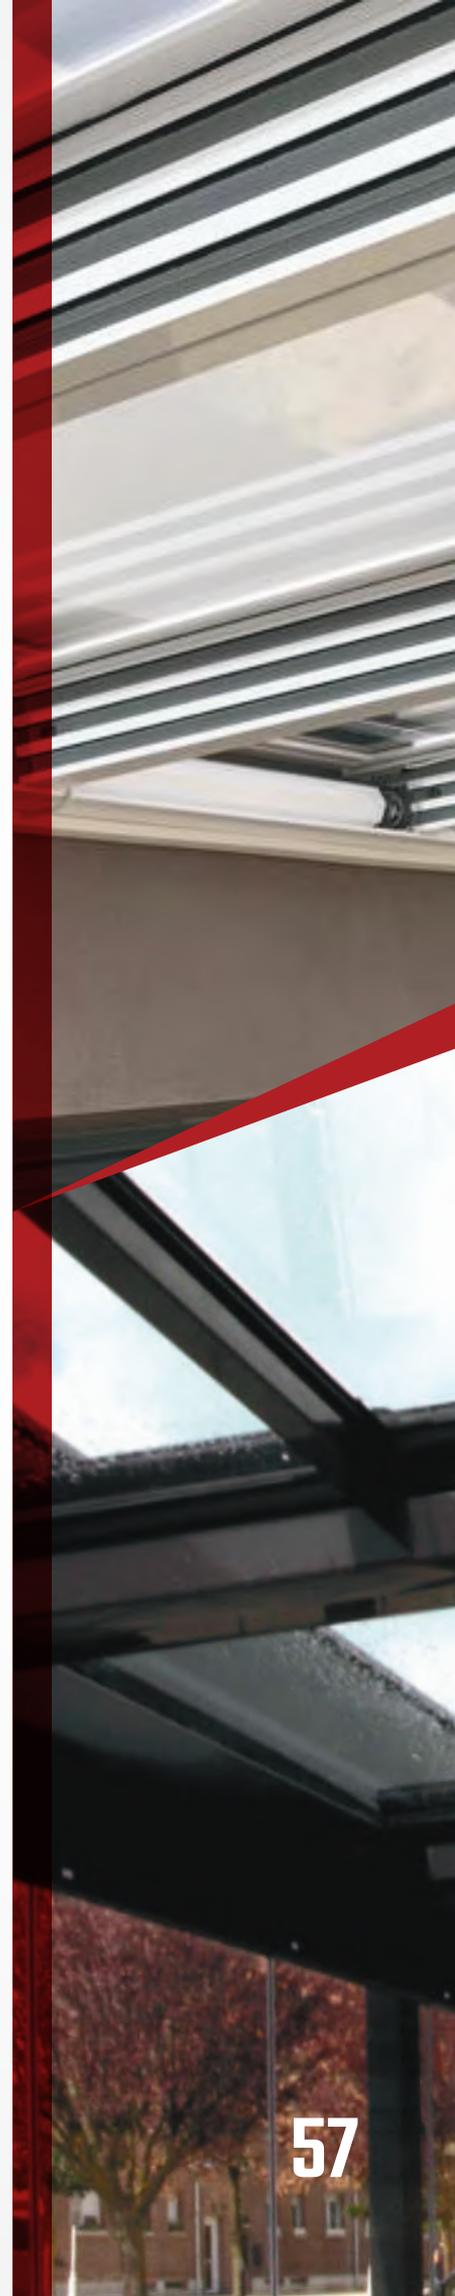

For more information:

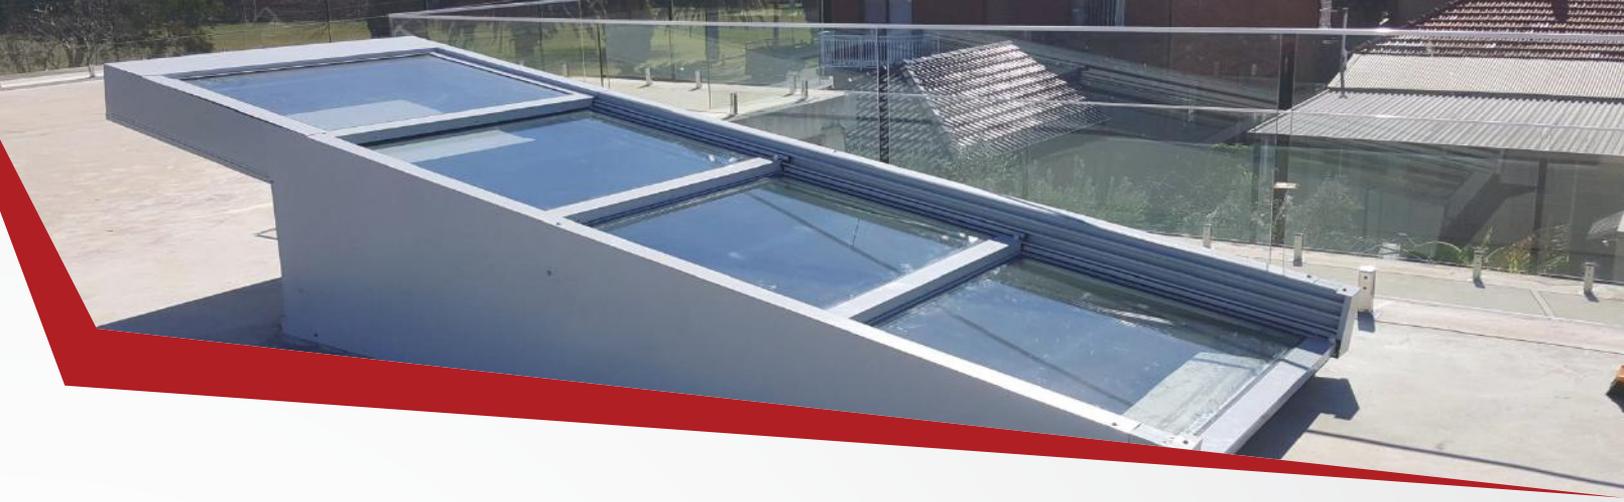

FEATURES

- The motor can open and close the roof panels. Depending on the request and necessity, transparent or reflective glass can be used.
- The materials and accessories used are crafted from stainless steel. The glass system is waterproof.
- The Retractable Glass Roof is designed to be aesthetically pleasing and provides a comfortable and reliable structure.
- It maximizes your experience and productivity in your garden, home, and workplace. This system is made of the highest quality products and works with engines.
- Optional sun and rain sensors give you the freedom to ventilate the environment without worry. It also protects your furniture from external factors.
- You can enjoy the sun during the day and the stars at night, and the waterproof ceiling is suitable for use in snow and rain. It brings the beauty of nature to you while you stay comfortable.
- The necessary accessories mounted on the windows are made of aluminum, so they won't rust.
- It is suitable for long-term use. Additionally, you can add ceiling curtains of various colors to the system, if desired.

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- The roof system consists of 3 or 4 panels joined together.
- The system's opening rate can be adjusted to either 4/3 or 3/2.
- Carrier profiles are spaced 450 cm apart in the system.
- Carcass profile dimensions are either 100x200 or 100x150.
- The profiles and accessories are made of aluminum and stainless steel.
- The glasses are 10 mm thick, consisting of two 5 mm layers laminated together.
- The roof has a slope between 10% and 25%.
- In addition, 4mm + 16mm + 4 mm insulated glass is used.
- The windows are waterproof and resistant to snow and other heavy loads.
- Optionally, sun and rain sensors can be installed.
- Optional horizontal Zip roof curtains can be installed to provide sun protection.

GUILLOTINE GLASS

The engine is guaranteed for 5 years and the mechanical parts for 2 years against all manufacturing and assembly defects. RF-controlled -120nm- Tubular Motor.

High thermal resistance Special guillotine zamak (zamac) wedge After the aluminum chromate application, the whole system is painted with electrostatic powder paint. Movable Handrail Guillotine System.

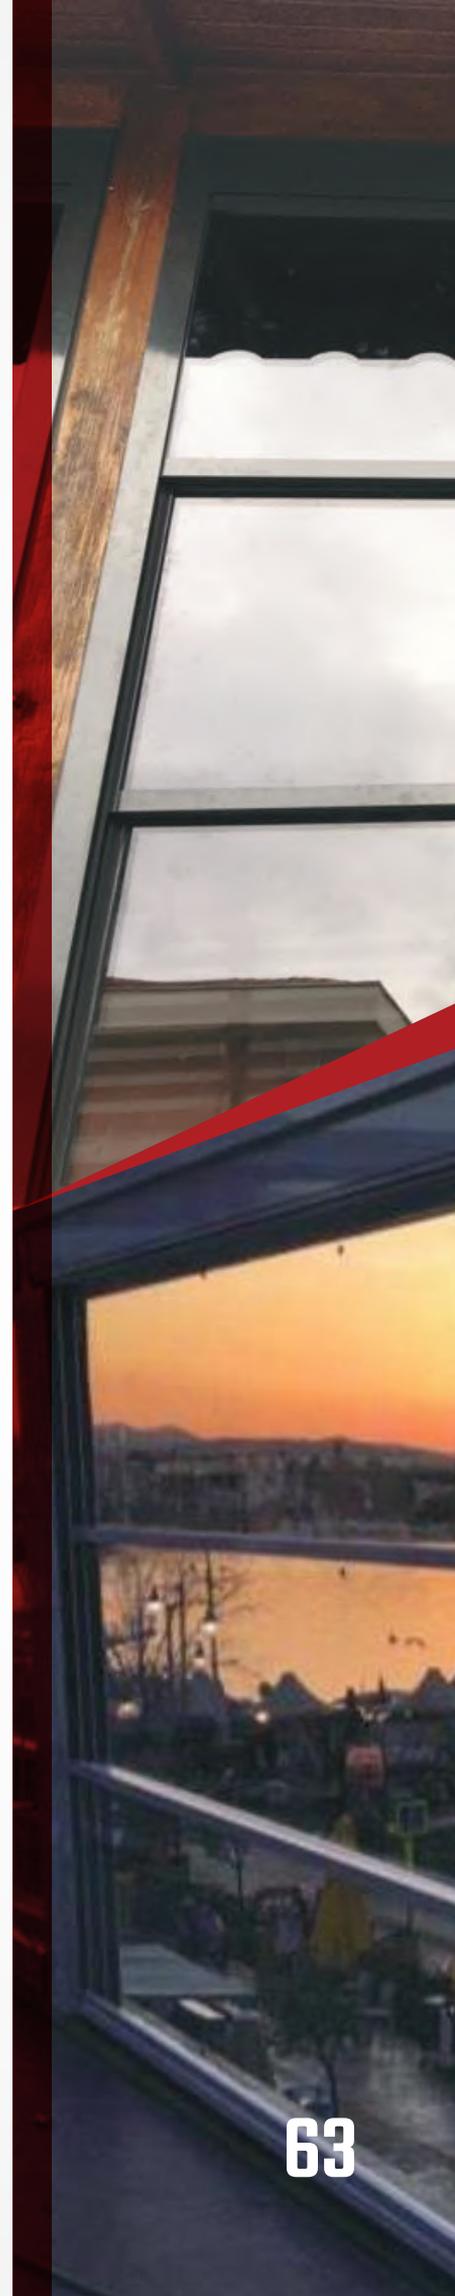

For more information:

FEATURES

- Panorama window systems have high-security standards.
- Panorama glass' patented 4-pronged worm screw drive system provides smooth operation and a high level of safety. An optional counterweight and 1/2' 08-B1 chain are used, while steel rope and timing belt are not.
- Air tightness is solved with EPDM gasket systems. The opening and closing of the panorama system are provided by a button or a command-controlled motor.
- Tempered and/or both sides tempered and/or laminated high safety glass are used in the panels, in accordance with international European standards.
- Our standard dimensions are 8 mm, according to the glass thicknesses and distance expansions used in the Panorama glass system. In addition, 4mm + 16mm + 4 mm insulated glass is used.
- The system provides the opportunity to be stopped at the desired position during motorized opening and closing.
- When the system is rolled down, it acts as a glass railing.
- Panorama windows are systems consisting of 2, 3, and 4 panels that provide 66% openness. The top 2 or 3 panels gather in front of the fixed bottom panel.
- The Panorama rail system and frame are produced from T-6063-F22 custom-made aluminum profile.

PANORAMA WINDOWS

- Panorama window systems offer an unobstructed view that spans the full width, without a vertical profile.
- Open and close the panorama window systems with one touch, without disrupting those around you.
- Panorama window systems provide a secure barrier even when fully opened.
- Glass edge expands the range of applications, enabling you to have more glass edge tables and to take full advantage of your view.
- Control the flow of fresh air entering with Panorama systems! No more exposing people to uncontrolled winds or compromising your comfort for fresh air. You can turn on the panorama systems as much as you need.

WINTER GARDEN

The Winter Garden is designed to make sure that the joy of your garden is not hindered by colder temperatures. Installed in an area of your garden or on the roof, these special places are designed with thermal insulation in mind. This not only makes them the perfect spot for your plants to thrive but also increases the quality of your home time spent in the garden.

Tailor-made to fit your specific needs, these gardens will be a source of pleasure for years to come. They bring a unique atmosphere to your outdoor space, creating a cozy, inviting environment for you to relax in. Whether your garden is small or large, installing a Winter Garden is an easy way to make the most of your outdoor time and enjoy your garden to the fullest.

For more information:

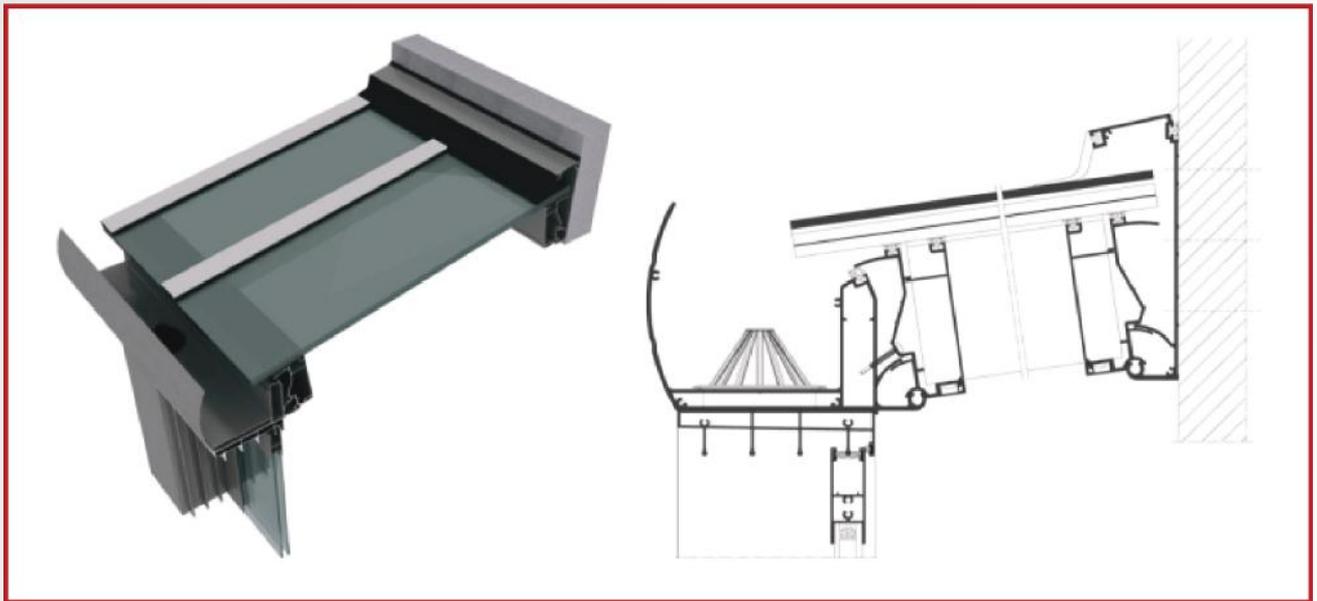

FEATURES

- It can be designed to meet demand and environmental conditions. Insulation glass and aluminum are employed in its construction.
- This product is rust-resistant and durable. It saves energy.
- Winter Garden provides a comfortable place during the winter months with a system that can be installed quickly.
- It has an aesthetic appearance and can be designed with glass, solid polycarbonate sheets, corrugated polycarbonate sheets, or partly glass, depending on the needs and conditions of the area.
- Its skeleton is made of high-quality, stainless materials, making it highly resistant to winter weather.
- Additionally, when double glazing is used, it reduces heat loss by up to 50%, making it ideal for energy saving.
- Aluminum is the preferred building material, as it is suitable for both hot and cold weather conditions.
- Even though it is designed for winter, its materials are resistant to all seasons, making it suitable for use in all four.

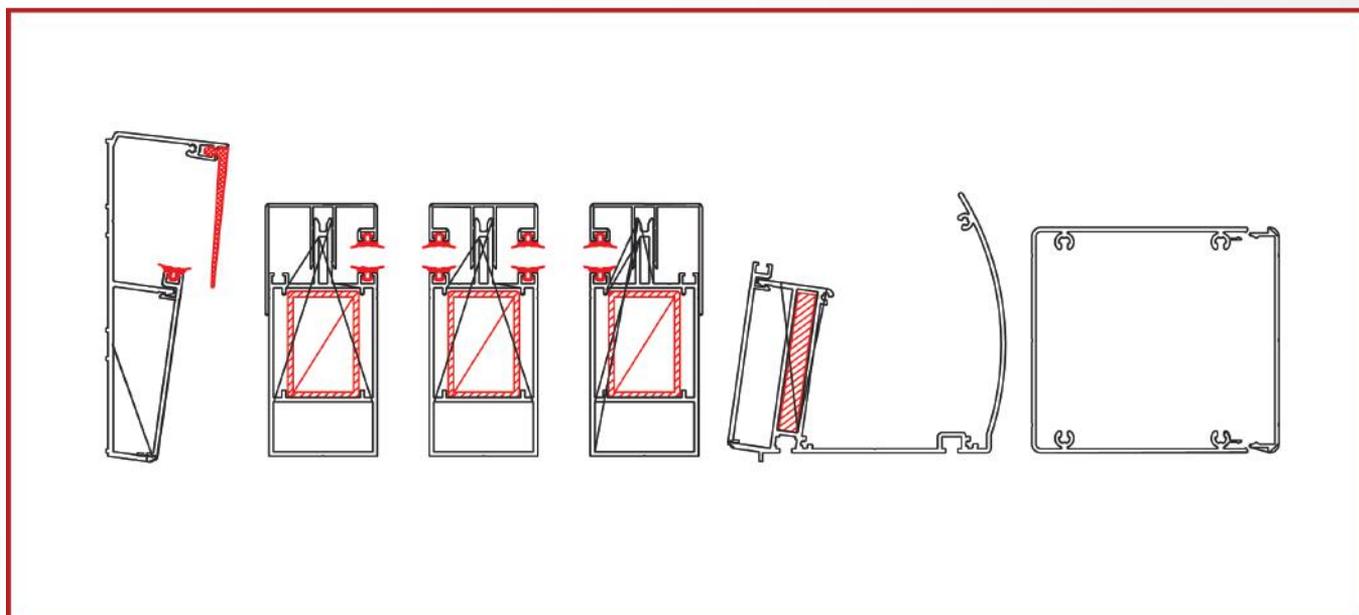

- The system has a 2-year warranty with International ISO 9001 & CE Standards.
- Design dimensions and roof slope can be customized upon request.
- Insulating glass helps to save energy.
- It reduces heat loss by approximately 50%.
- It can be made entirely of glass, or partially.
- Optional folding or sliding glass systems can be added for extra convenience.

- This product is waterproof and can withstand snow loads.
- It is durable, won't decay, and won't corrode.
- Aluminum is the preferred building material.
- It has heat and sound insulation capabilities.

VERTICAL ZIP CURTAIN

Vertical Zip Curtain is an ideal choice for those looking to add a modern touch to any outdoor space. With its economical and durable design, it is perfect for both home and work use. Not only is it a stylish choice, but it also offers a wide selection of colors and high-quality fabric, making it a great way to draw attention.

Furthermore, its high resistance to wind and rain damage makes it a great choice for outdoor areas that are exposed to inclement weather. Additionally, its easy installation process makes it an effortless addition to any outdoor space. With Vertical Zip Curtain, you can easily enhance the look and feel of your outdoor space while also providing long-lasting protection.

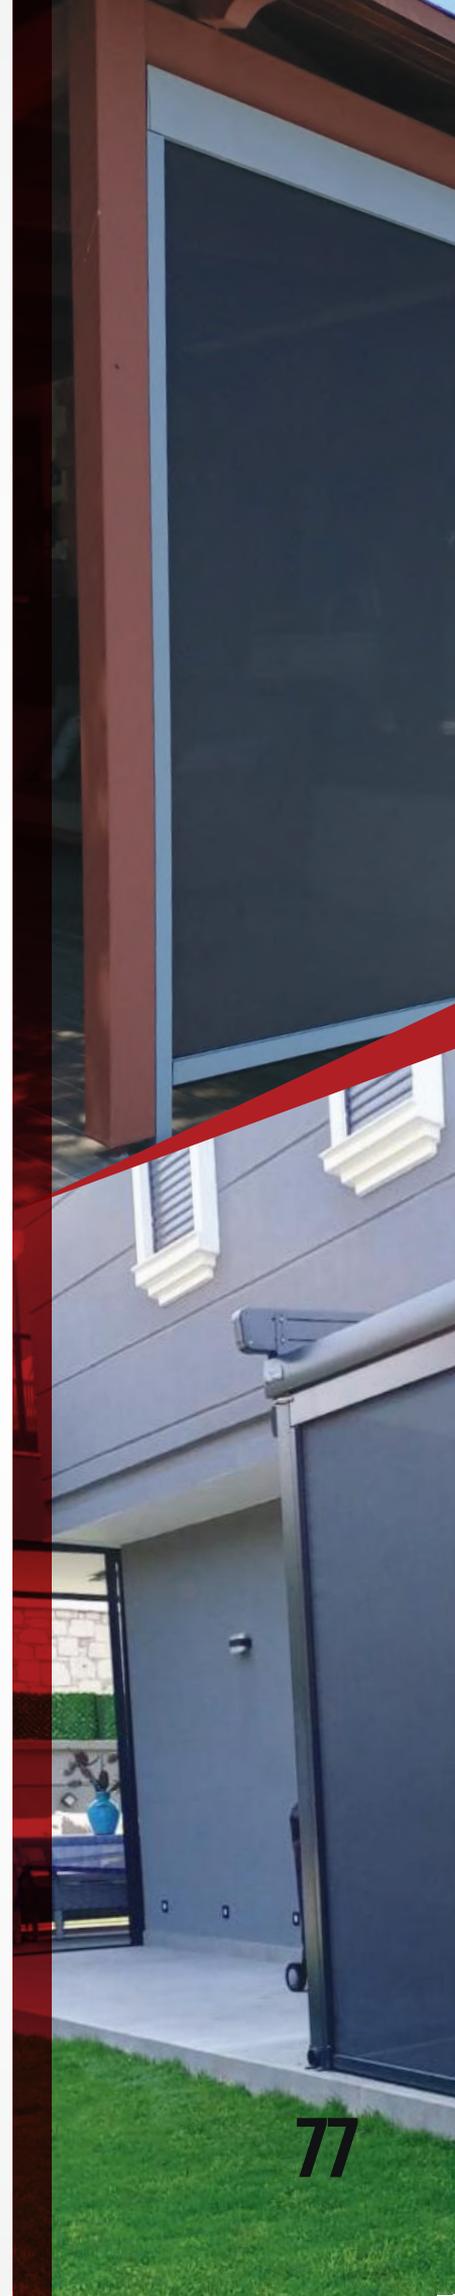

For more information:

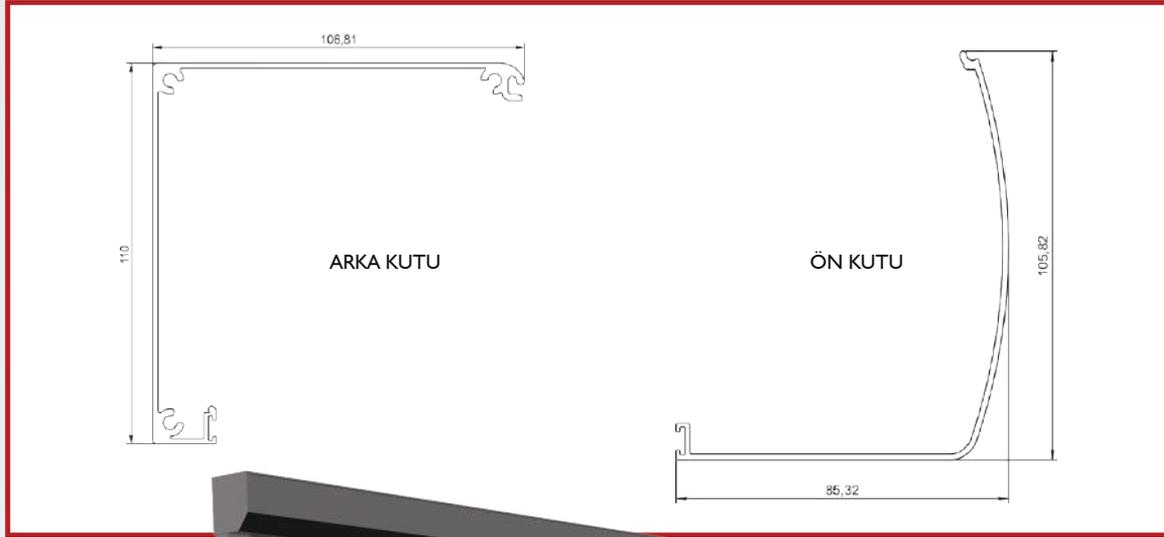

FEATURES

- This system operates with a motor. Its fabric is of high quality and resistant to weather conditions.
- Rich color options are available. It is durable and practical.
- Working with a motorized system, Vertical Zip Curtain is designed to match the architectural aesthetics of any space.
- This product is easy to use and suitable for both interior and exterior facades.
- It is ideal for exterior use, providing excellent thermal insulation and light insulation to protect from the sun's harmful effects.
- It is especially preferred by workplaces in various sectors due to its light and durable fabric structure, which does not require maintenance or cleaning and eliminates the problems associated with seasonal conditions.
- It provides shade in summer and protects windows and spaces from rain and wind.
- It also prevents dusty and polluted air from entering the space and can be opened and closed easily.

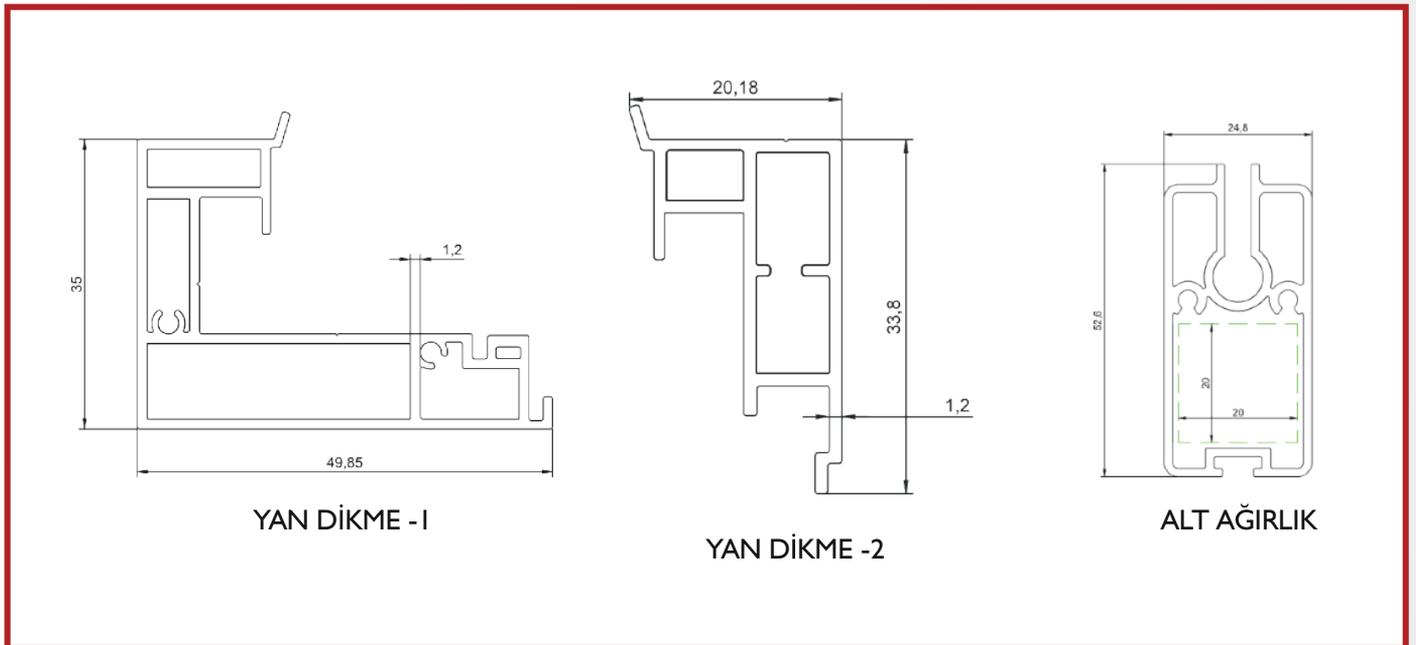

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- The fabric is covered by a 5-year warranty.
- It can be used both indoors and outdoors.
- It provides a 30% reduction in heat loss when used indoors.
- Zip Curtain systems are compatible with the engine.

- Opening and closing can be controlled using either a remote or a wall-mounted control device.
- Wind and rain sensors can be added optionally.
- It is made from composite material.
- Its perforated structure gives it high resistance to the wind blowing at high speeds.
- The fabric system is designed to be waterproof.
- It is resistant to wear and tear.
- It's convenient and straightforward to maintain.

HORIZONTAL ZIP CURTAIN

The Horizontal Zip Curtain is a great way to add a modern and stylish design to any glass roof or winter garden. Constructed with top-quality fabric, it provides both sun and protection against the elements, such as rain, wind, and even snow. In addition, the motorized system makes it easy to use, giving you the peace of mind that your furniture and products are protected from the elements.

With its easy installation and low maintenance requirements, the Horizontal Zip Curtain is sure to be a great choice for any glass roof or winter garden.

For more information:

FEATURES

- This angled system is ideal for roofs. The system works with motorized components and sensors can be added.
- Fabric that is resistant to all types of weather is used. No matter your preference, there are plenty of color and pattern options to choose from.
- Horizontal Zip Curtain is a highly preferred product with many useful features, adding beauty to inclined glass roofs.
- It is used both in winter gardens and in houses and workplaces with glass roofs. The motorized system, which can be controlled with a remote or wall button, consists of stainless parts and a tight curtain.
- It provides shade against the sun's rays and is resistant to cold and harsh weather conditions.
- It also maintains the dryness of the place by preventing melting snow and rainwater from passing through, and acts as a filter against dust and dirt, providing environmental hygiene.
- It has different color options and is suitable for long-lasting use.

It is an economical option compared to roof solutions alternatives, and its modern and stylish design offers an aesthetic appearance to your outdoor spaces.

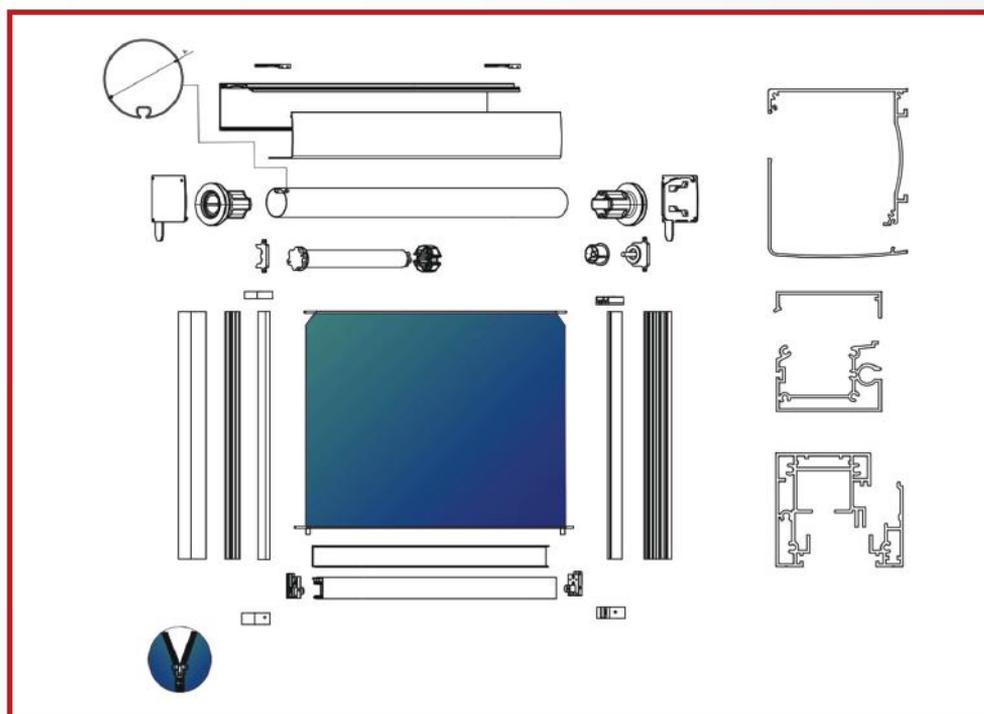

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- The fabric is covered by a 5-year warranty.
- An innovative, angled zipper system is used.
- The motorized system is guaranteed to be long-lasting.

- Controlled remotely or with a wall switch.
- The system's materials are of high-quality stainless steel.
- The system's spring mechanism creates an ultra-taut fabric look.
- Thermal insulation provides energy savings.
- The special fabric is waterproof.
- The fabric is highly resistant to wear and tear.
- Its perforated structure makes it extra durable against high-speed winds.
- Carrier feet that can be integrated into various surfaces are utilized.

TRANSPARENT STOR

Transparent Stor is designed to blend seamlessly into the environment, preserving the area's colour scheme and overall aesthetic. Moreover, it provides protection from the elements, shielding from the sun's rays, wind, and rain. Not only does it protect against the elements, but its thermal insulation feature helps to save energy, ensuring the space is kept comfortable with minimal energy expenditure.

Additionally, its transparency allows for a view of the outside environment from within the space, preserving the connection to the outdoors even when indoors. With various opening percentage options available upon request, Transparent Stor is the perfect solution for outdoor spaces, providing protection and insulation while maintaining a seamless aesthetic.

For more information:

FEATURES

- Manual and motorized options are available. Alternatively, you can choose either one.
- Insulation features are available. It doesn't have a negative impact on the visual appeal of its surroundings.
- Transparent Store is an ideal solution for those who want both an attractive look and insulation and protection.
- It allows you to watch the outside with a glass-like view and experience the comfort of the interior without paying as high a cost as Moving Glass systems.
- It has a zipper system and offers two types of service: manual and motorized. The fabric is designed with special weaves, so the percentage of clarity (i.e. transparency) varies depending on the fabric and its quality.
- The crystal clear PVC tarpaulin of the product is also resistant to wear and tear and has insulation properties. It is very easy to maintain.
- Additional parts that provide curtain tension and control are made of stainless steel.
- It is produced with special chemicals to prevent matting and yellowing-like effects. The motorized system is controlled by a remote control or wall button.

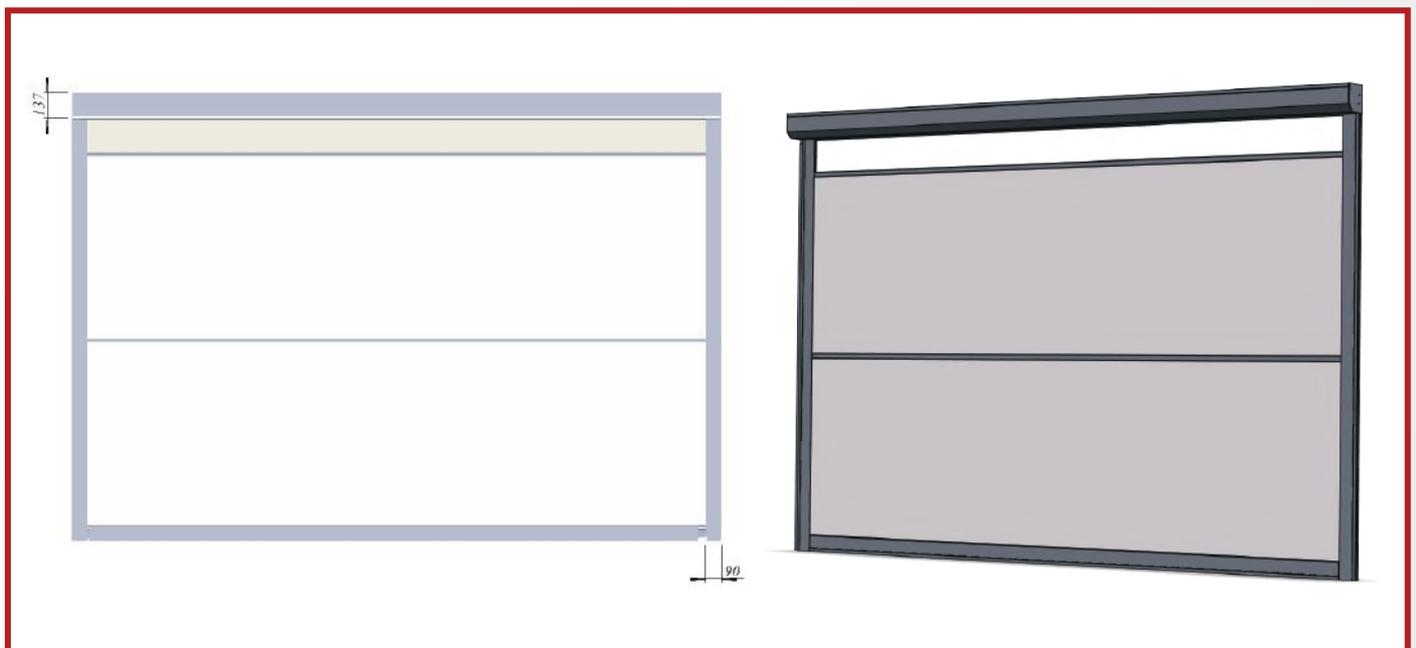

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- Crystal-transparent PVC tarpaulin with a weight of 1000 g/m² is utilized.
- The tarpaulin is covered by a 5-year warranty.
- The structure features a zipper system.

- It can be produced manually or with a motorized system.
- Crystal PVC Transparent Canvas is highly durable. It can withstand wear and tear, making it a great choice for long-term use.
- The accessories are made of aluminum, so they won't rust.
- The desired color is achieved through electrostatic powder painting.
- It has heat and moisture insulation capabilities.
- Its insulation feature helps save energy.

TRANSPARENT SLICE CURTAIN

Slice Curtain is an incredibly useful and modern product, widely used in factories all over the world. It is simple to use, easy to maintain, and can be produced in any size or dimension. This system, which is also commonly referred to as Butcher Curtain, is extremely robust and durable, with galvanized rail hangers that can provide excellent support to factory partitions, entrances, and other areas.

Additionally, the product is made with highly durable materials and can withstand a wide range of weather conditions, making it a reliable choice for any industrial setting. It also requires minimal maintenance and can be easily and quickly installed in any type of facility.

For more information:

FEATURES

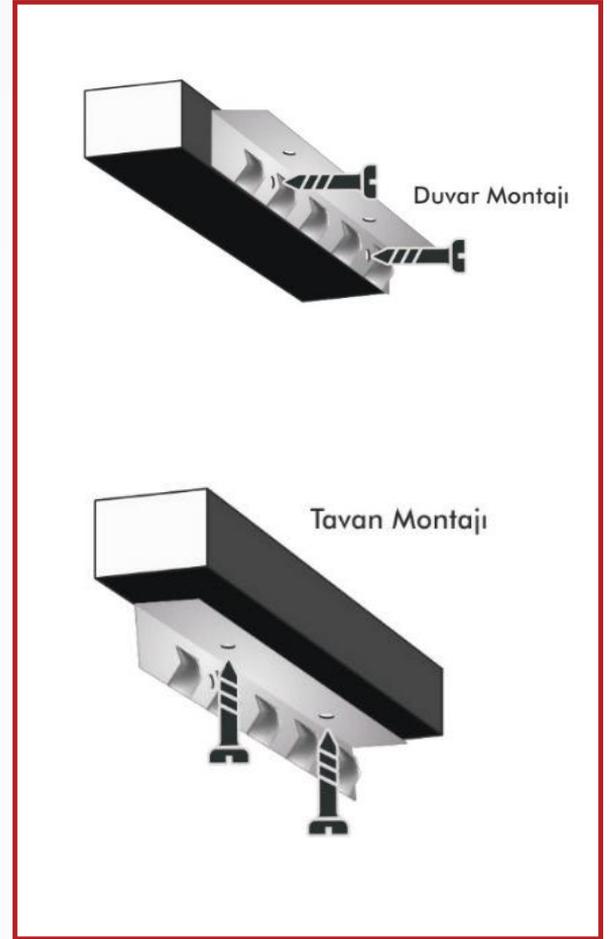

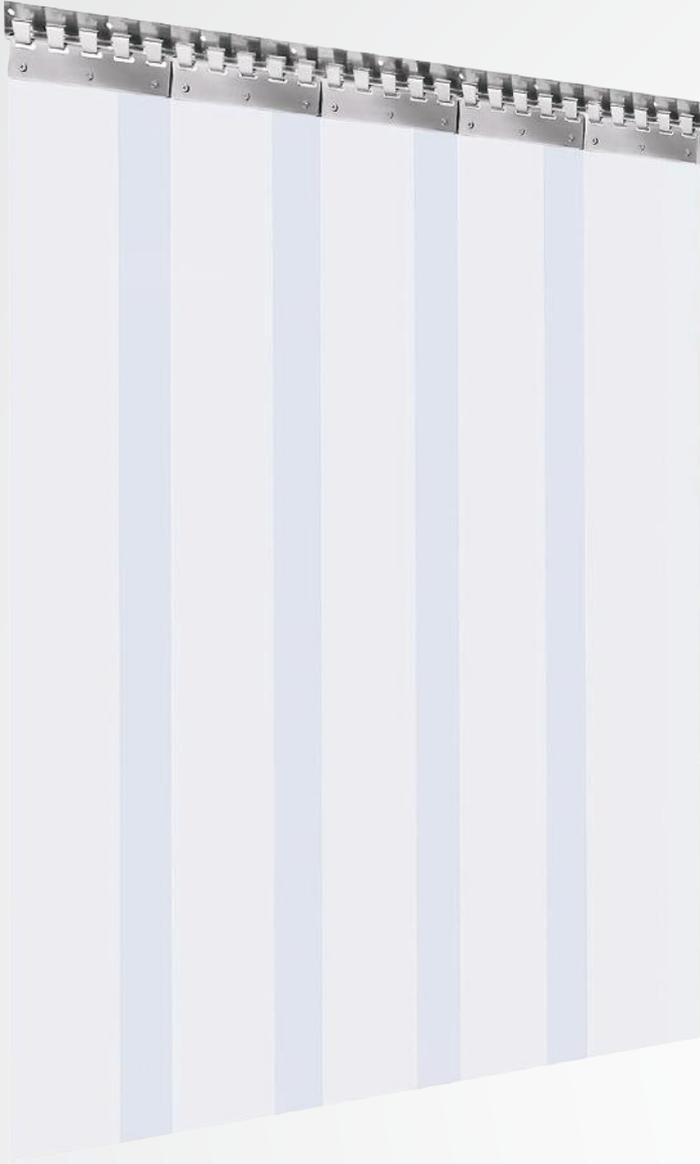

- The case is made of stainless steel. It is long-lasting; it won't dull or turn yellow.
- This curtain can be mounted on the ceiling, cornice, or wall, making it incredibly versatile.
- Its fabric is resistant to wear and tear and is not easily damaged by moisture, offering you a long-term solution for your window treatments.
- Furthermore, the curtain features both transparent and opaque stripes, allowing it to provide you with a perfect amount of privacy and light no matter the time of day.

PVC MATERIAL FEATURES

- This product contains an ultraviolet blocker that offers resistance to yellowing and cracking caused by sunlight.
- It doesn't block sunlight from entering the environment.
- The flame retardant in its composition prevents it from burning.
- It can be used indoors and outdoors. It is suitable for an unlimited number of personnel and vehicles.
- It is transparent. Our PVC products boast visible transparency, with almost no vision loss, giving them a distinct advantage in terms of safety.
- Safe. Our PVC strips and plates are fire-resistant and have rounded edges for increased safety. It's easy to clean PVC materials. Just wash and rinse with soapy water.

STANDARD PVC STRIP

- Standard PVC Strips are permeable to light and contain a UV blocker, providing protection against fire and blocking ultraviolet rays.
- These strips are widely used in the production of PVC Strip Doors, PVC Plates for special partition applications, and PVC Panels for PVC Swing Doors.
- They are capable of withstanding temperatures as low as -18 degrees and are transparent with a light blue hue.

HANGER SYSTEM

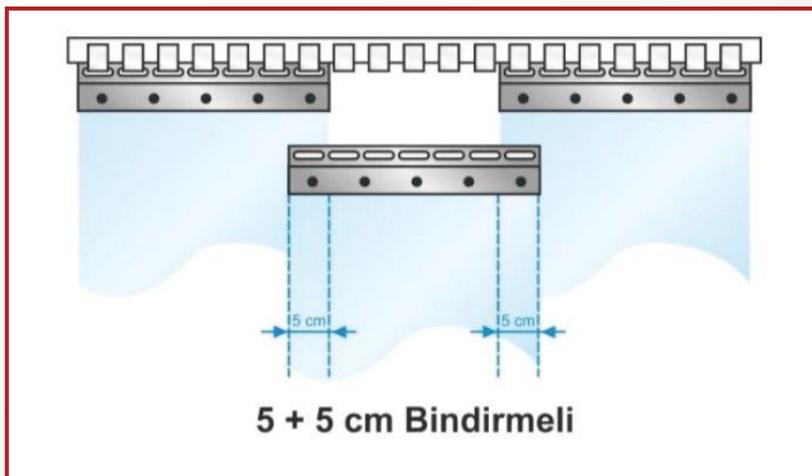

- Hangers can be made of stainless steel or galvanized steel, depending on preference.
- Stainless steel hangers and rivet plates are ideal for use in food-related businesses.
- Each strip can be attached and detached individually.
- Easily attachable and removable strips are easy to clean, making them long-lasting.
- The assembly process is straightforward, cost-effective, and can be completed quickly.
- The overlay rate can be adjusted to suit your needs.

MOUNTING TYPES

1. WALL MOUNT

2. CEILING INSTALLATION

- In both cases, the same hanger is used.
- When ordering, specify the preferred mounting method based on the condition of the door/area where the curtain will be hung.
- Wall mounting is the best option if there are gaps on the sides and top of the door. If there are no gaps, ceiling mounting should be preferred.
- The order shown in the picture should be followed when hanging the strips.

VEHICLE APPLICATIONS

HIGH SPEED PVC DOOR

High-Speed PVC Doors are perfect for many applications, both indoor and outdoor. Constructed with 650g/m² or 900g/m² flame retardant tarpaulin, they are designed to provide protection from heat, odors, and dust, while also offering great energy efficiency.

Moreover, they are equipped with a silent system and come in a wide range of colors, making them highly compatible with the look and feel of any environment. With all these features and benefits, High-Speed PVC Doors are a great choice for many commercial and residential settings.

For more information:

FEATURES

- Steel is used for the base and support bars of the structure. It insulates against heat, dust, and wind.
- It comes in various sizes. Different color options are available.
- High-Speed PVC Doors are suitable for both interior and exterior use in factories and come in a variety of sizes and models, allowing for installation with or without a threshold, making them ideal for any situation.
- Not only are they easy to maintain and clean, but the insulation feature helps to conserve energy and protect against heat, odor, and dust.
- Additionally, they have a long lifespan and are made with fire-resistant raw material, giving them a much higher flammability temperature than wooden doors, making them a great alternative when it comes to door materials.
- With easy installation and maintenance, as well as their added benefits, High-Speed PVC Doors are an excellent choice for any factory.

- The engine has a 5-year warranty and the system has a 2-year warranty, both in accordance with International ISO 9001 & CE Standards.
- This tarpaulin is covered by a five-year warranty.
- Door speed ranges from 0.75 to 1.2 meters per second.
- It is resistant to high-speed winds.
- Flexible PVC and polyester are the raw materials used.
- It has heat insulation capabilities.
- It is resilient to external influences and conditions.
- It has a high ignition temperature and is fire-resistant.
- Automation can be combined with remote control or manual buttons.
- Manual locks can be applied.
- Tarpaulin support bars are constructed from steel.

FACTORY COMPARTMENTS

Employees from a variety of industries are finding that Factory Compartments are a great way to increase production efficiency and ensure the safety of their workers. Not only do these compartments provide hygienic cleaning, but they can also be designed to meet the individual requirements and needs of each organization.

The insulation and insulation properties of the compartments will depend on the type of material used in their construction, and they can provide an attractive and modern look while offering cost-effective solutions for factory and workshop-like environments.

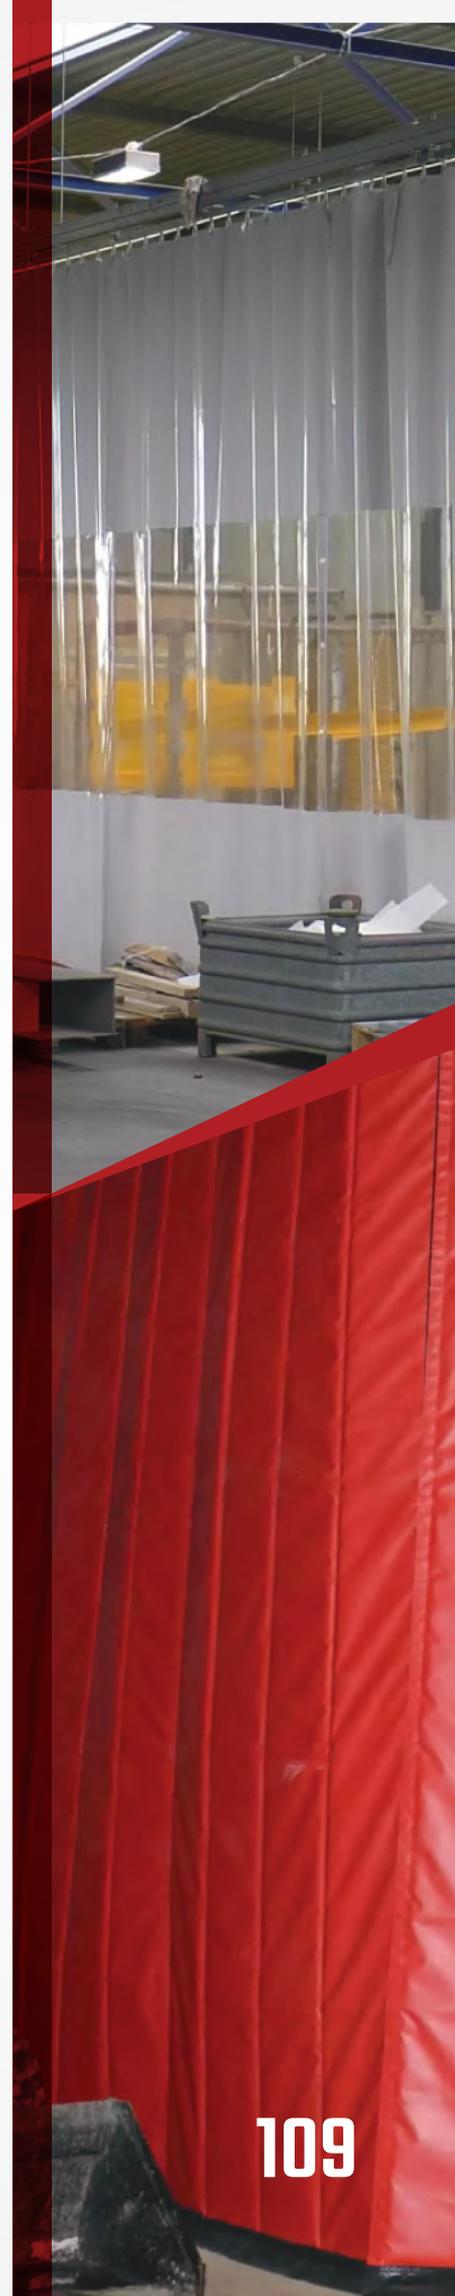

For more information:

FEATURES

- Furthermore, these compartments are capable of performing a variety of functional tasks, making them an even more attractive option for many businesses.
- By installing Factory Compartments, companies can look forward to improved efficiency and safety, as well as a modern aesthetic that will impress customers and clients alike.
- It is suitable for production environments, such as factories and workshops. It has insulation and isolation properties.
- Its structure is durable. You can choose from a variety of colors.
- Factory Compartments offer a more cost-effective and advantageous option than walls for production areas. They are designed to meet the needs of employees from different sectors and increase their productivity.
- These compartments provide solutions to business and storage problems for workshops that require independent areas.
- They have a stylish appearance with different color options and are suitable for use for many years due to their structure. Factory Compartments are produced and used as sliding, rail, or curtain systems.
- Tarpaulin or transparent PVC material is generally preferred in their design. PVC material has flame-retardant properties, making it highly resistant to flame. It also increases working comfort with its insulation and insulation properties, as well as being waterproof and moisture resistant.
- Furthermore, it is double-sided laminated, making it quite useful.

FORKLIFT TARPAULIN COVER

The Forklift Tarpaulin Cover is designed with safety as the foremost priority for both the driver and the products being transported. It is able to prevent any disruptions from occurring in the transportation and storage processes, especially during rainy weather. This ensures that you can continue with your work without any interruptions.

As an added bonus, the cover also offers protection to the driver from dust, dirt, and other external factors. What makes this cover even more remarkable is its transparency, which does not obstruct the driver's viewing angle in any way.

For more information:

FEATURES

- It is also constructed using hot air bonding machines, making it exceptionally durable and easy to open and close with its zippered system. This makes it an ideal choice for anyone who needs to transport goods safely and securely in all kinds of weather conditions.
- Produced with driver safety as a priority. A solid polycarbonate sheet is used at the front to ensure visibility.
- Dimensions can differ depending on the vehicle. Color options are available to maintain the vehicle's aesthetic appeal.
- Forklift Tarpaulin Cover offers functional convenience in many sectors where transportation and storage operations are important.
- It ensures not only driver safety but also the safety of your products. It is designed to be resistant to harsh weather conditions and external factors, with quality seams and zippers that are not easily affected by wind speed and humidity.
- It is easy to open and close thanks to its zippered system, and is generally transparent, with color options compatible with the vehicles.
- Solid Polybarkon Material is used on the front to not impede the viewing angle and quality. This glass-like product is flameproof.
- It provides insulation against dust and dirt, increasing the comfort and safety of the driver, and helping you to continue your operations in different conditions.

TENSILE STRUCTURE MEMBRANE SYSTEMS

Tensile Structure Membrane System is a perfect combination of form, aesthetics, and functionality. It provides a modern and aesthetic look to any environment. The structures are composed of special 3-layer tarpaulins with weights ranging from 700g/m² to 1300g/m², along with a steel construction.

This ensures long-lasting use, thanks to hot-dip galvanization and electrostatic powder paint coating. It is designed to adapt to various climatic conditions, and it comes in different color options.

For more information:

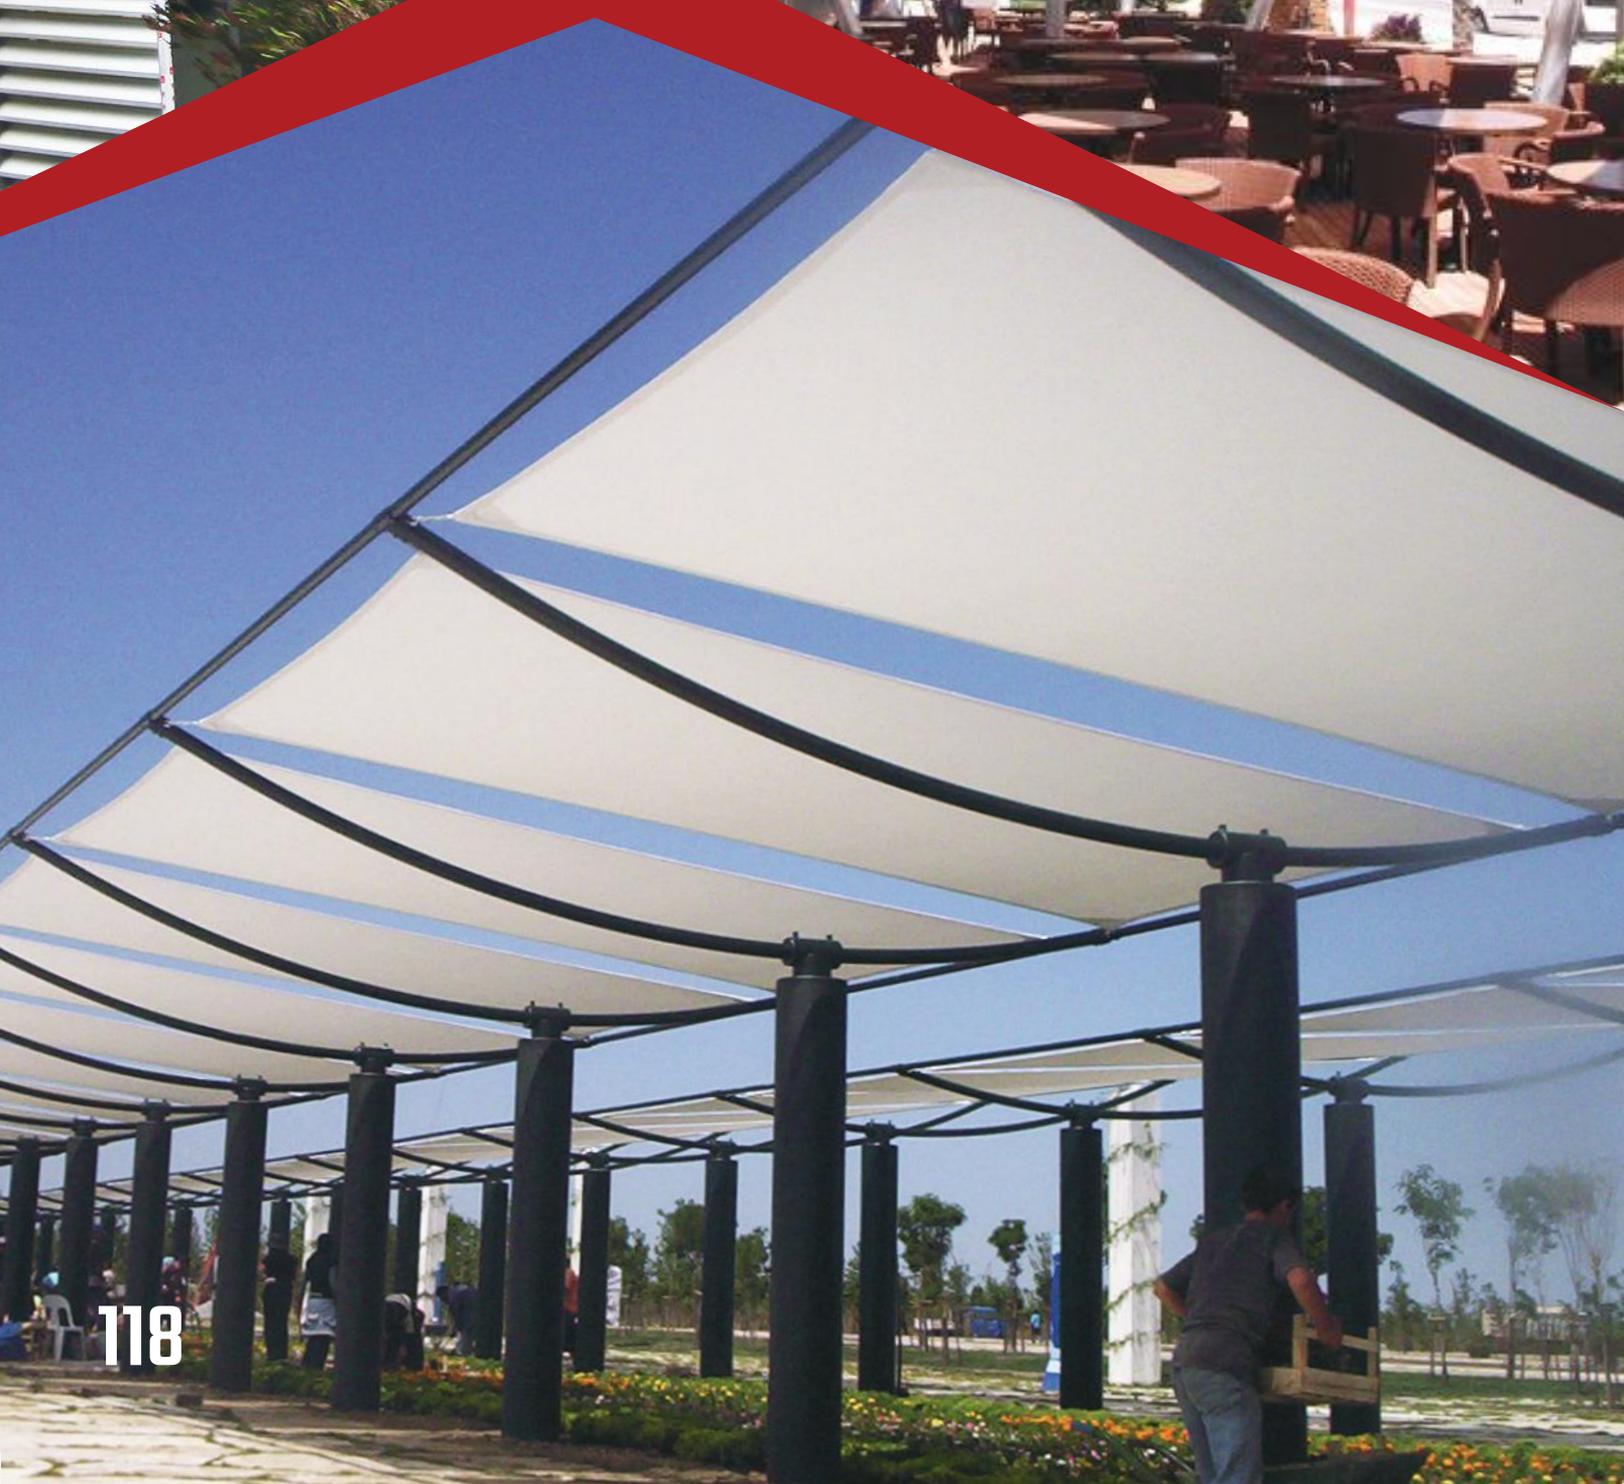

FEATURES

- Environmental conditions are taken into consideration when installing. Narrow and wide widths are suitable for a variety of applications.
- It is adaptable to various climatic conditions. Different color options are available.
- Tensile Structure Membrane System is ideal for large areas. It has a PVC or PTFE coating that adjusts sunlight transmittance and increases weather resistance.
- It is also more resistant to tearing and wear. The carrier system is made of ST37-ST52 steel structures coated with hot-dip galvanized and electrostatic oven powder paint, making it rust proof and durable.
- The accessories and materials used to provide fabric tension are also of high quality, rustproof, and long-lasting.
- The membrane material is light, and the system can be dismantled and moved when desired.
- It is moisture-resistant and can carry a snow load, making it suitable for environments requiring wide openings.
- Additionally, the design can be adapted to the environment.

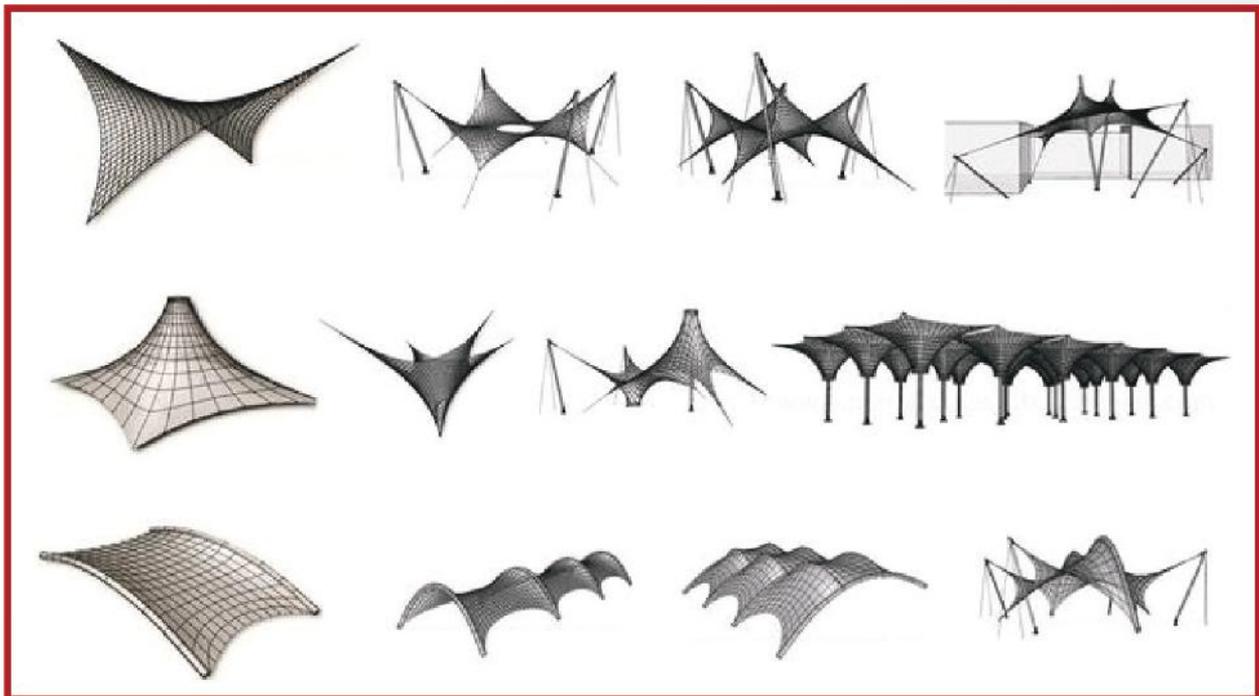

- The tarpaulin is covered by a 10-year warranty.
- Membrane covers are composed of polyester or glass fibers.
- Covers can be coated with PVC, PTFE, or silicone material.
- The carrier system is made of steel and is protected from rusting by special coatings.
- The fabric's tension can be adjusted according to the environment and weather.

- The light transmittance rate varies, depending on the fabric structure.
- It is weather-resistant.
- The system is resistant to snow load.
- This solution is perfect for its aesthetic forms, providing protection from both sun and rain.
- Transparent materials are available.

VEHICLE APPLICATIONS

Vehicle Applications offer a range of solutions to make transporting items you use indoors or outdoors to your vehicles easy, comfortable, and safe. From awnings, tents, and tarps to protect you and your vehicle from the elements to taking advantage of the power of digital printing to add your business logo to your vehicle, these applications are perfect for ensuring your goods are secure and your brand is recognizable everywhere you go.

Your customers will have faith in your work, as well as the confidence that you take your business seriously. With the help of Vehicle Applications, you can be sure your goods are safe and your brand is seen.

For more information:

FEATURES

- It is weather-resistant. Manual and motorized systems are available.
- It is useful and enduring. Different colors and patterns are available.
- Vehicle applications include services such as truck tarpaulin, pick-up truck awnings, and sliding rail systems.
- These products are resistant to cold and hot weather conditions, as well as wind and rain. They are waterproof and moisture-resistant and can carry a snow load.
- The supporting systems are made of aluminum and galvanized steel, making them rust-proof. The PVC structure is fireproof and resistant to wear and tear.
- It is also suitable for digital printing, making it a useful and economical application. It isolates the transported products from dust, dirt, and other factors, and is protective against sun rays.
- Manual and motorized systems are available, and motorized systems can be controlled with remote control.
- Stylish options are available that adapt to every vehicle model, with different color variations.

TENT

**MEDIUM AND SMALL SIZE
TENT**

**INDUSTRIAL HANGAR
WAREHOUSE
SITE TENT**

MEDIUM AND SMALL SIZE TENT

Small and Medium-sized Tents. These elliptical tents usually start from 4m x 4m and gradually expand.

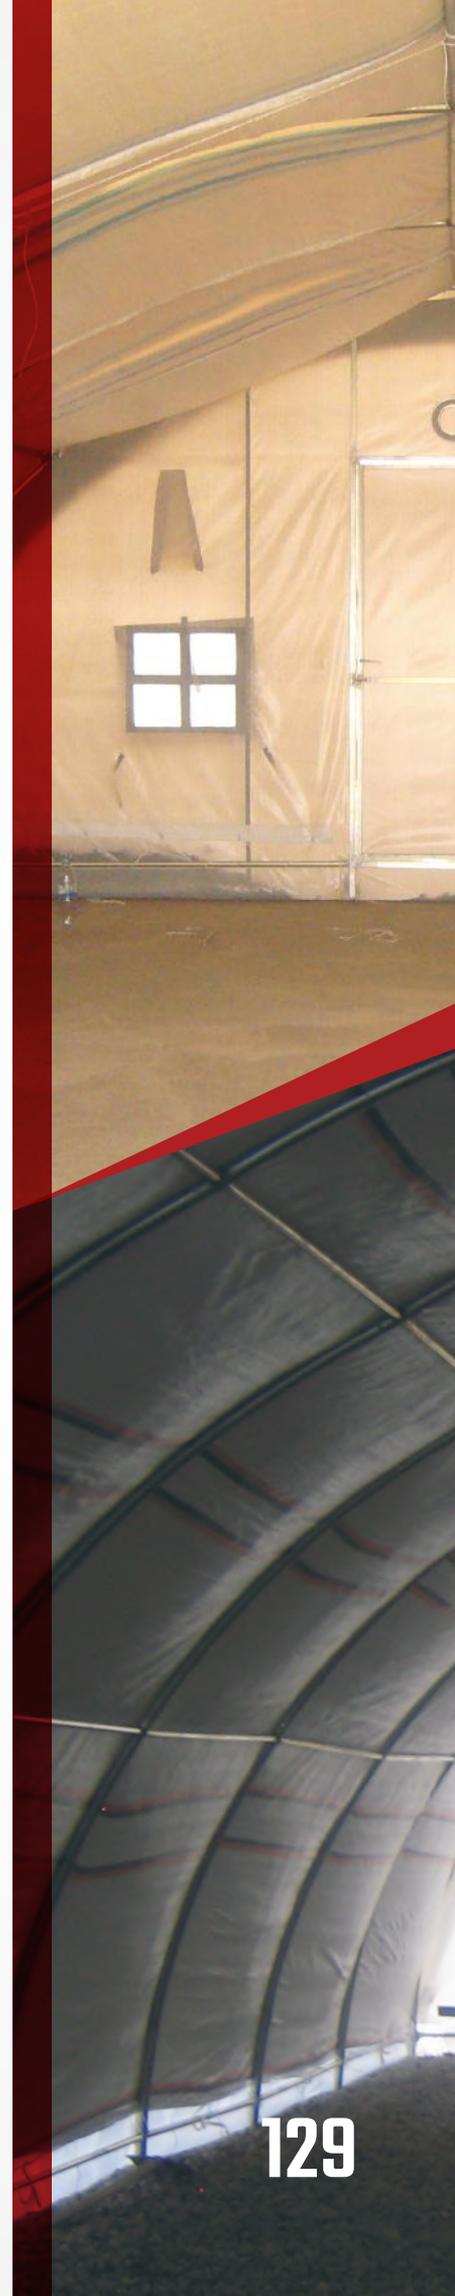

For more information:

FEATURES

- Side heights start from 160 cm and go up to 200 cm. Center heights are between 300 cm and 400cm.
- Two doors and ventilation windows are standard in the products.
- Carrier pipe or box profiles of all tents, regardless of scissor or ellipse model is coated with hot dip galvanized. Connection equipment is also galvanized.
- These products serve many different purposes in terms of easy installation and portability and can be installed over and over again.
- Our tents are delivered as insulated, unless specifically requested. Uninsulated tents will cause high sweating and disturb the customer.
- Depending on the intended use, they can serve as a warehouse, dining hall, kitchen, camping tent or dormitory.
- In elliptical models, usually diameter 42x1.5 mm pipes form the main skeleton. Intermediate connection pipes will be diameter 32x1.5mm. Box profiles used in scissor systems will vary according to the area and width to be covered.
- The tarpaulins of the tents also vary according to the intended use and price scale.
- Starting with 550g/m², tarpaulins are also available in 900g/m² UV blocking double-sided lacquer coated models. We try to produce solutions to all the needs of our customers with many different models from special tents reinforced with high quality technical textile products with blackout features to economical camping tents.

INDUSTRIAL HANGAR WAREHOUSE SITE TENT

They are generally produced for wide and deep areas that require a scissor structure.

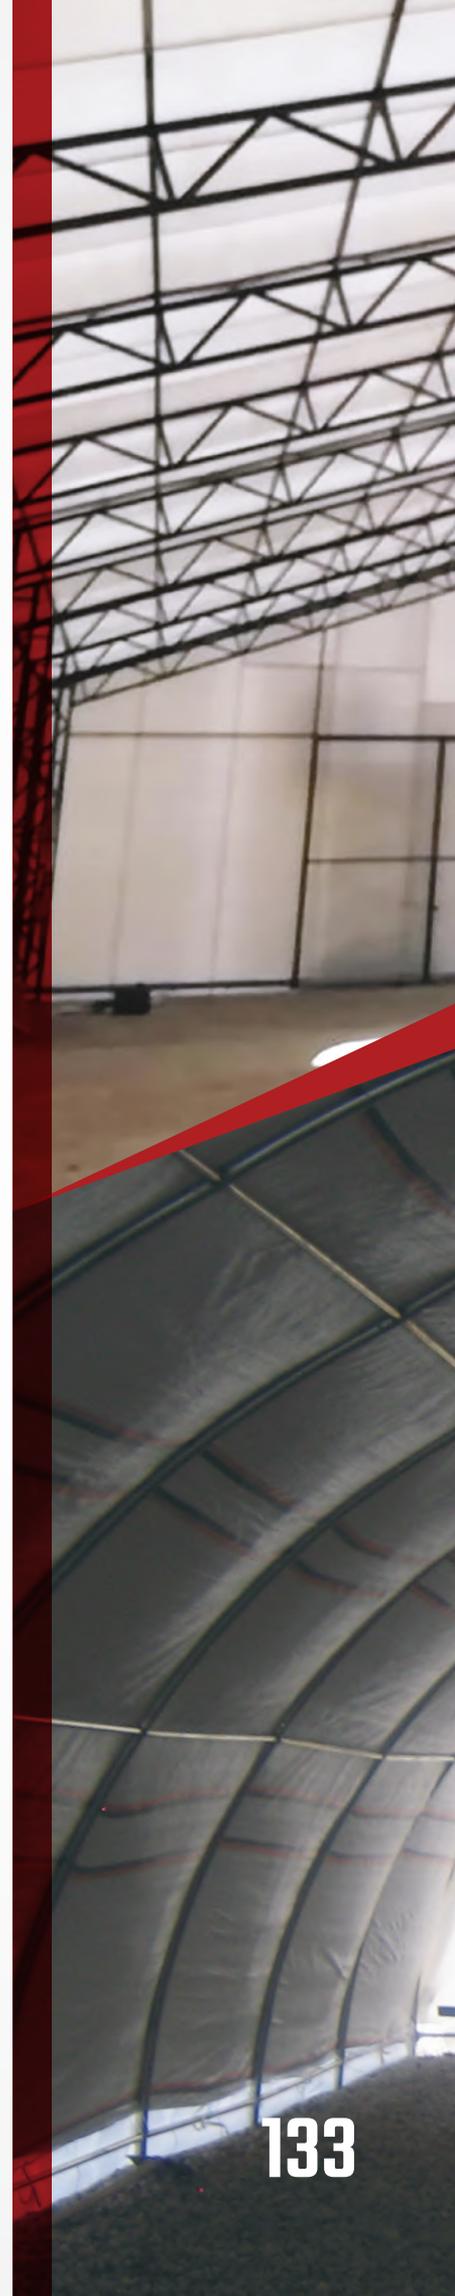

For more information:

FEATURES

- Edge heights start from 200cm and go up to 500cm. Middle heights are between 600cm and 900cm.
- Two doors and ventilation windows are included as standard.
- Carrier pipe box profiles of all tents, regardless of scissor ellipse model is coated with hot dip galvanized. Connection equipment is also galvanized.
- Our tents are delivered as insulated, unless specifically requested. Uninsulated tents will disturb the customer with high sweating.
- Aluminum coated special intermediate materials are used for insulation. Breathable materials are also included between the layers.
- These tents are generally made of flame retardant material considering occupational health and safety.
- Depending on the intended use, they can serve as hangar, warehouse, dining hall, kitchen, field tent dormitory.
- The box profiles used in scissor systems will vary according to the area and width to be covered.
- The tarpaulins of the tents also vary according to the intended use and price scale.
- Starting with 650g/m², tarpaulins are also available in 900g/m² UV blocking double-sided lacquer coated models. We try to produce solutions to all the needs of our customers with many different models from special tents reinforced with high quality technical textile products with Blockout feature to economical camping tents.
